# Using your illuminated mirror

Touch controls for power, brightness and light colour.

### Tap once

Tap the sensor to switch the mirror light on or off.

### Press & hold

Hold the sensor to adjust the brightness.

### Double-tap

Tap twice to cycle through the three light colours.

## Choose your light colour

Colour temperature (CCT) describes the tone of the light.

**3000K**
Warm white

**4000K**
Daylight

**6500K**
Cool white

30 MINUTES

## Built-in demister

Helps keep the heated area of the mirror clear of condensation. It activates with the light button and switches off automatically after 30 minutes.

## Lighting styles

| | |
|---|---|
| **Backlit** | Light projects from behind the mirror. |
| **Front-lit** | Light shines through the front of the mirror. |
| **Diffused edge** | A frosted border softens light passing through the front. |

Touch controls and demister apply to illuminated models only.
